

INCIDENT REPORT

INCIDENT	INC109720389	CREATED BY	Jordan Bingaman
AZURE BUG	695698	CREATED DATE	29-Jan-2026
PTC CASE	18007559	ASSIGNED TO	Keshavamurthy Hg
PRIORITY	Priority 4	RESOLVED DATE	16-Feb-2026

SHORT DESCRIPTION	DESCRIPTION
Edit Association button is missing from Volvo Part (maybe after Windchill 13)	Users need to be able to edit association on a released volvo part to add an image association (for TIMs). This was possible in the past, but I believe that the button visibility has changed in WC13. See for example. Also See (Edit association is possible from the cad side). From a released volvo part, go to related objects, cad/dynamic documents... in the past an "edit associations" button was visible here and it was possible to add image associations

PROBLEM STATEMENT

- Edit Association button is missing from Volvo Part (maybe after Windchill 13)
- Users need to be able to edit association on a released volvo part to add an image association (for TIMs). This was possible in the past, but I believe that the button visibility has changed in WC13. See for example. Also See (Edit association is possible from the cad side). From a released volvo part, go to related objects, cad/dynamic documents... in the past an "edit associations" button was visible here and it was possible to add image associations

ROOT CAUSE

- As discussed, Jordan has already created an Azure Feature:

RESOLUTION & RECOMMENDATION

- As discussed, Jordan has already created an Azure Feature:
- https://dev.azure.com/VolvoGroup-DVP/VCEWindchillPLM/_workitems/edit/695698
- As confirmed by PTC, we need to provide the Modify permission for VP to enable the Edit Association function under the Related Objects tab. This allows image association without iterating the VP.
